

Module 1

Data Warehouse Concepts and Architectures

Lesson 4: Learning effects for data warehouse development

Lesson Objectives

- Discuss challenges in data warehouse projects
- Explain learning effects for maturity and project management
- Reflect on importance of intangible benefits for data warehouse investments

Challenges in Data Warehouse Projects

- Substantial coordination across organizational units
- Uncertain data quality in data sources
- Difficult to scale data warehouse

Intangible Benefits

- Not easily quantified but important for an organization's success
- Increased data quality
 - Fewer missing values
 - More matched entities
 - More data availability
 - Higher levels of compliance with data standards
- May become tangible over time

Learning Curve for Skills

Learning Curve for Production

Maturity Relationships

Business Value Learning Curve

Data Transformation Learning Curve

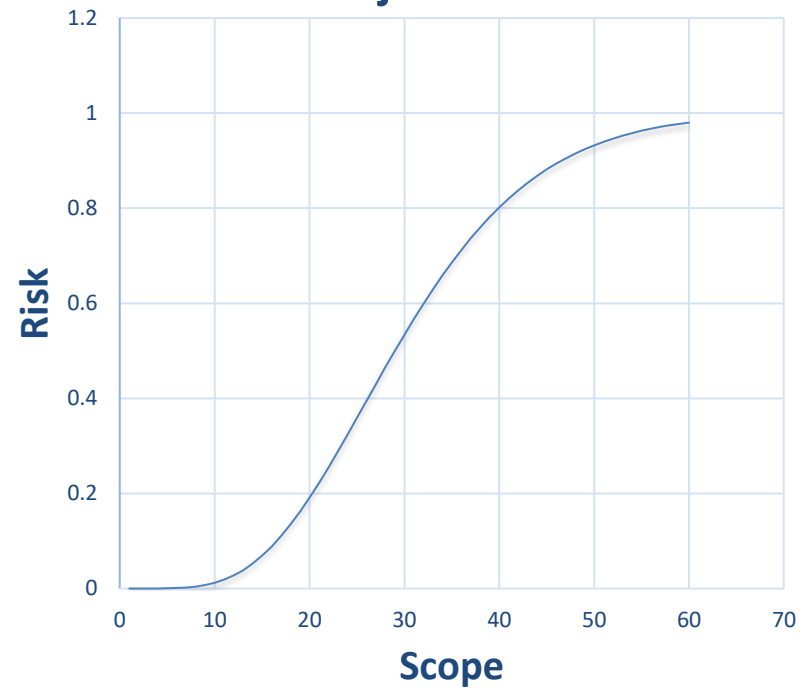

Project Relationships

Potential Value

Project Risk

Summary

- Project difficulties and intangible business value
- Learning curves for skills and production
- Learning curves for maturity and project scope
